

Stitch along with the Official Quilters Select Group, to create a semi-controlled, improvisational mystery quilt!

- The Mystery> Only Mother Nature knows where & when each fabric will be used!
- The Improve> The spontaneity of the color placement & experimentation with a traditional unit (Dresden Wedge) lends itself to an improvisational experience.
- Semi-control> And for those who like a little structure...the Temperature Quilt Guidelines keep the quilt from becoming chaos!

Getting started:

- Watch “Just the Facts/Temperature Quilt “ video for information on planning your custom version (posting 12/15/25).
- Determine the time range & location for data tracking. The instructions/weekly check-ins assume a one-year (current) quilt.
- Gather fabrics> approx 1 yard each of 20 fabrics. Fabric suggestions discussed in Just the Facts video.
- The Quilters Select 18° Dresden Ruler will be used for the layout featured in the group (other options will be discussed in Just the Facts video).
- Approx finish based on the featured layout BEFORE adding borders: approx 60” x 75”.
